

Welcome to Dashboard!

- 1: Search for something (eg. your name)
- 2: Look at the result updating in real time
- 3: Add to the Watchlist the things you care for

Pssst.. You can even close this window and return later
we will remember and show your watchlist results.
But don't do that now! :-)

Welcome to Dashboard!

- 1: Search for something (eg. your name)

- 3: Add to the Watchlist the things you care for

Pssst.. You can even close this window and return later
we will remember and show your watchlist results.
But don't do that now! :-)

Suggestion are based on
co-occurency against other
users and bare frequency if
that fails

A [commit](#) on Project Gemini by Alfred with comment "Adapted to new button design". A week ago.

The wiki page ["updated design guidelines for the button widget"](#) was updated by Jack. 12 days ago.

Maggie wrote on IRC: "we are working on a major breakthrough in the design of the application" in channel [#gemini](#). 14 days ago.

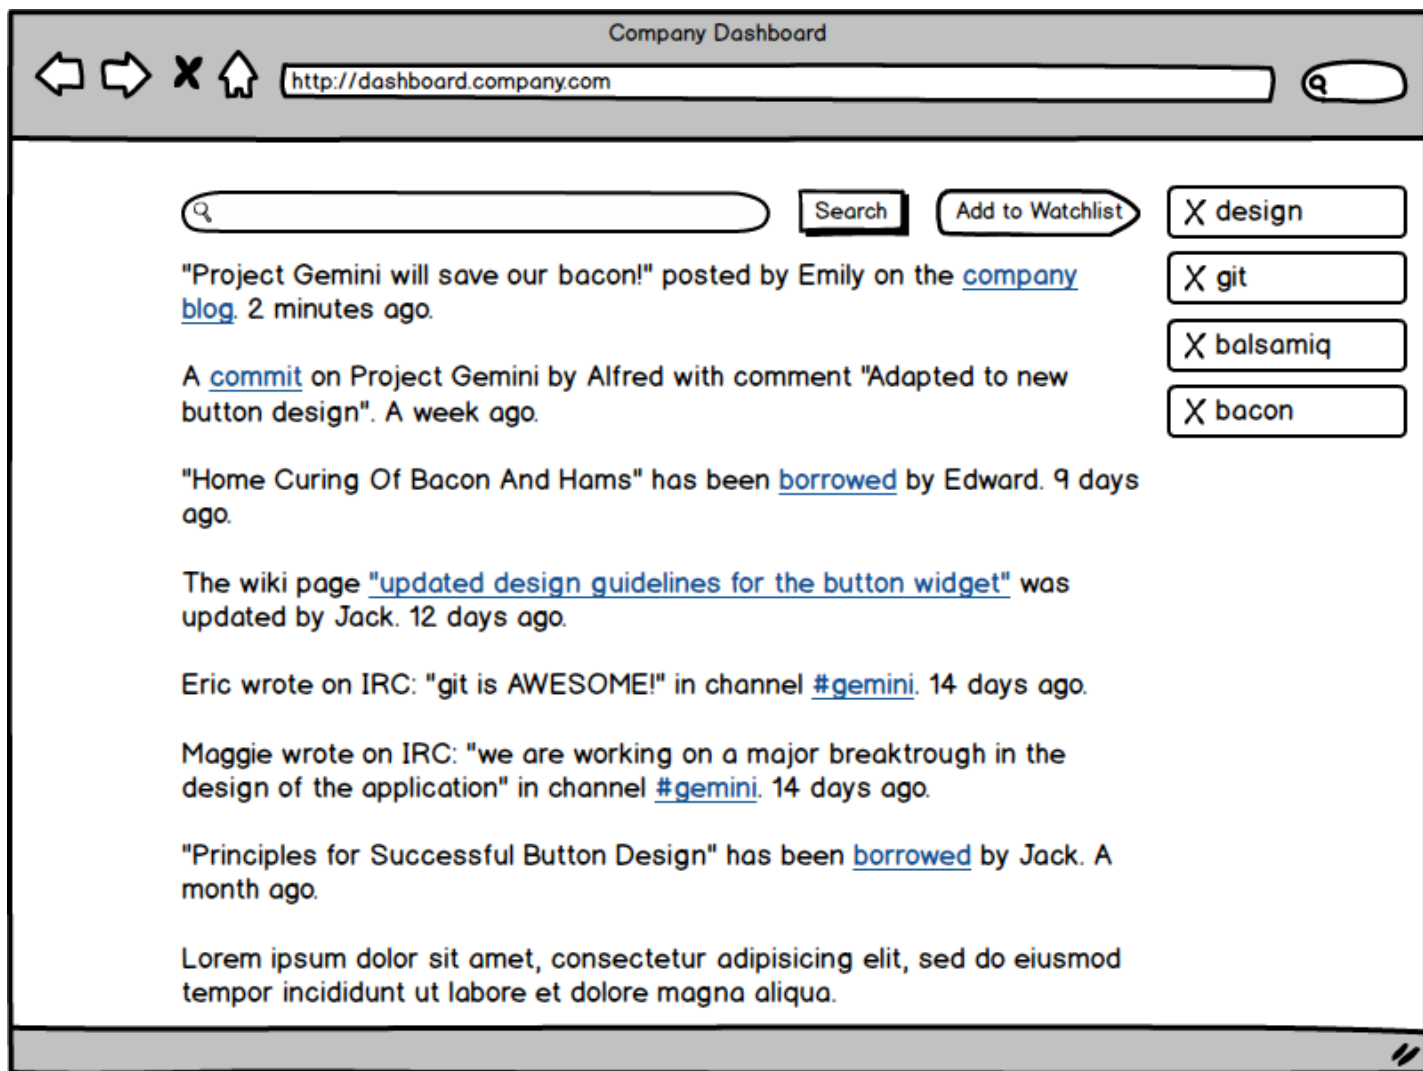

"Principles for Successful Button Design" has been [borrowed](#) by Jack. A month ago.

Links point to internal resources (wiki, blog, irc, library..) that are not part of this application

The X should be red
and on the right side

The user clicks on the
X to remove the topic

After few days the homepage for the user should look something like this..
